

# Our journey towards a digital decommissioning and waste management

## DigiDecom 2021 – DIGITAL

Online international workshop focusing on digital transformation, robotics and other game changing trends in nuclear decommissioning

Ole Jakob Ottestad - ICT manager

DigiDecom, Halden 22.03.2021

NND, Storgata 2, 1767 Halden, Norge – [post@nnd.no](mailto:post@nnd.no)

NND is a governmental agency under the Norwegian Ministry of Trade, Industry and Fisheries, established 2018

# Handle the nuclear heritage

Nuclear facilities in Halden

Nuclear facilities in Kjeller

Existing and future deposit, radioactive material

2020

+ ~100 yrs

Decom

Operation

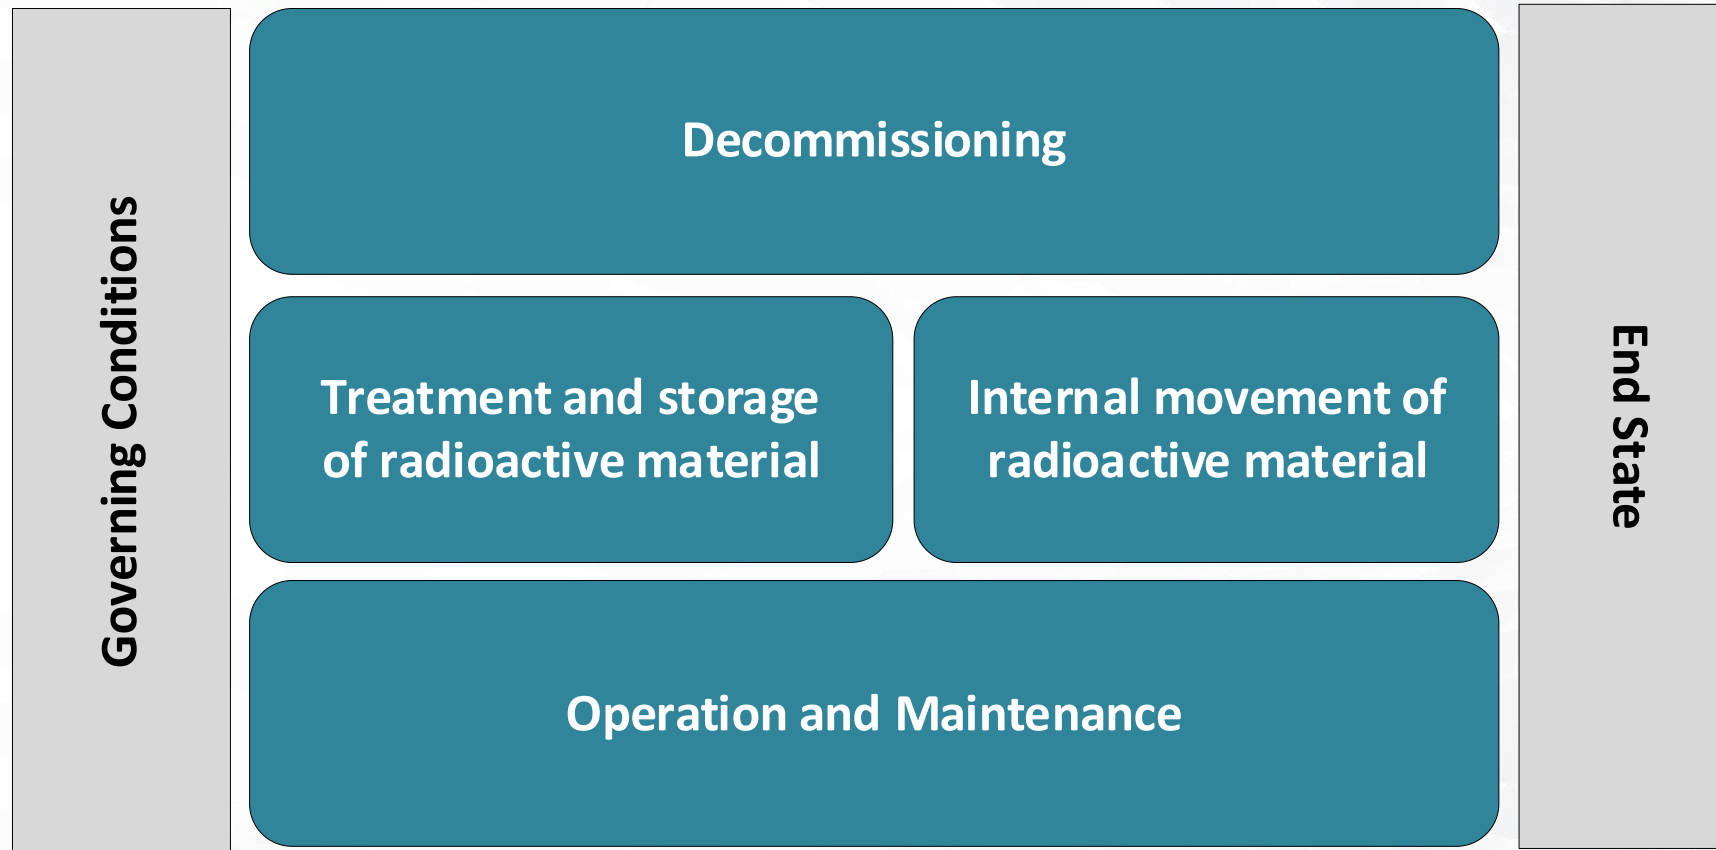

Monitoring

~2040

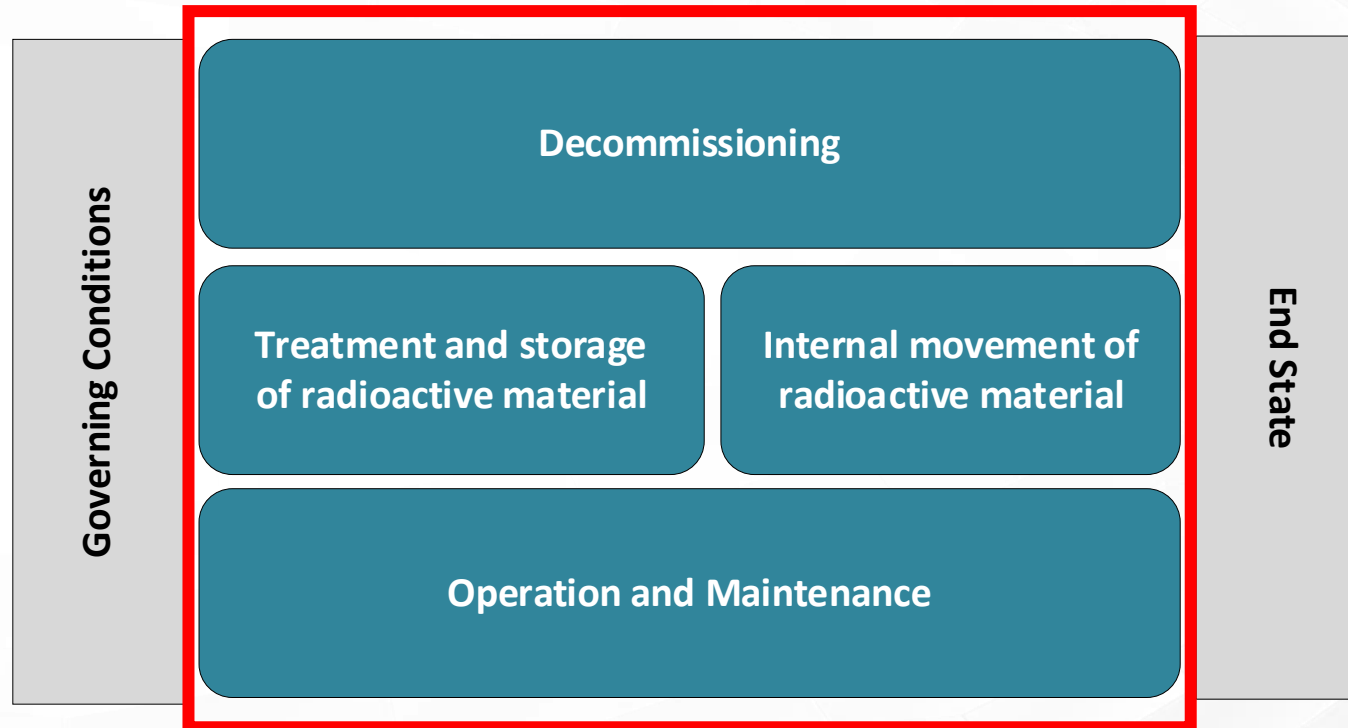

+ 300 yrs

# Main processes – targets for digitalization

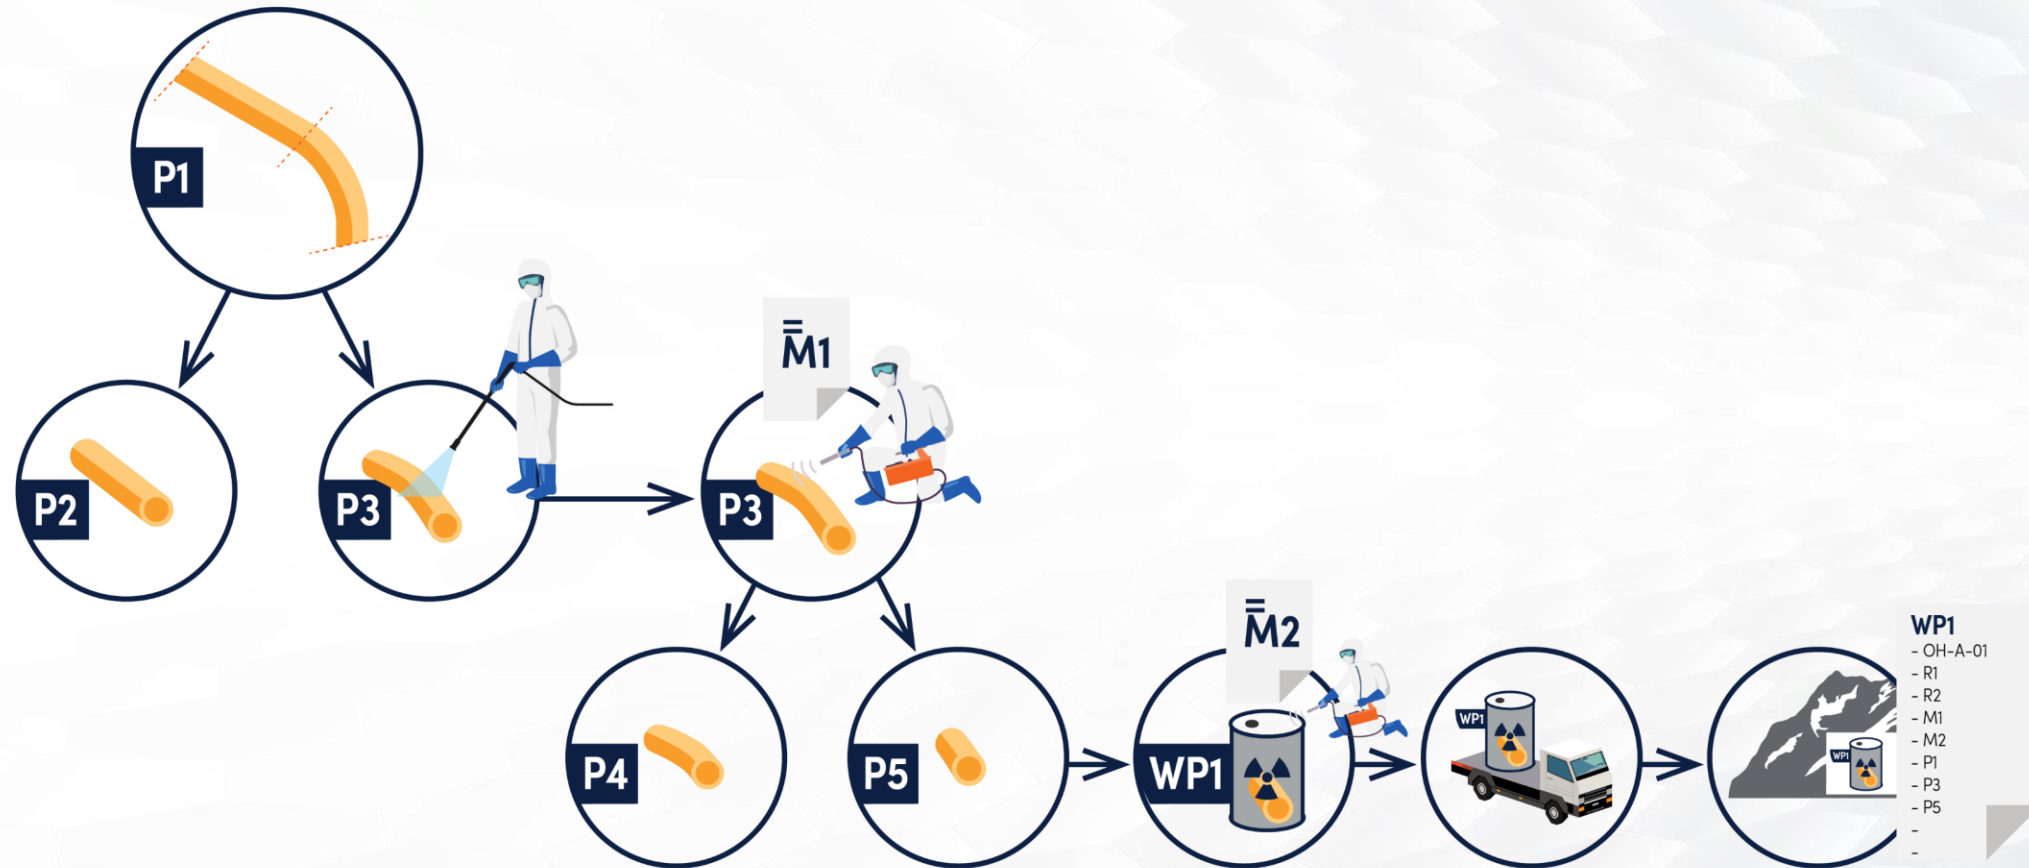

# Main processes – targets for digitalization

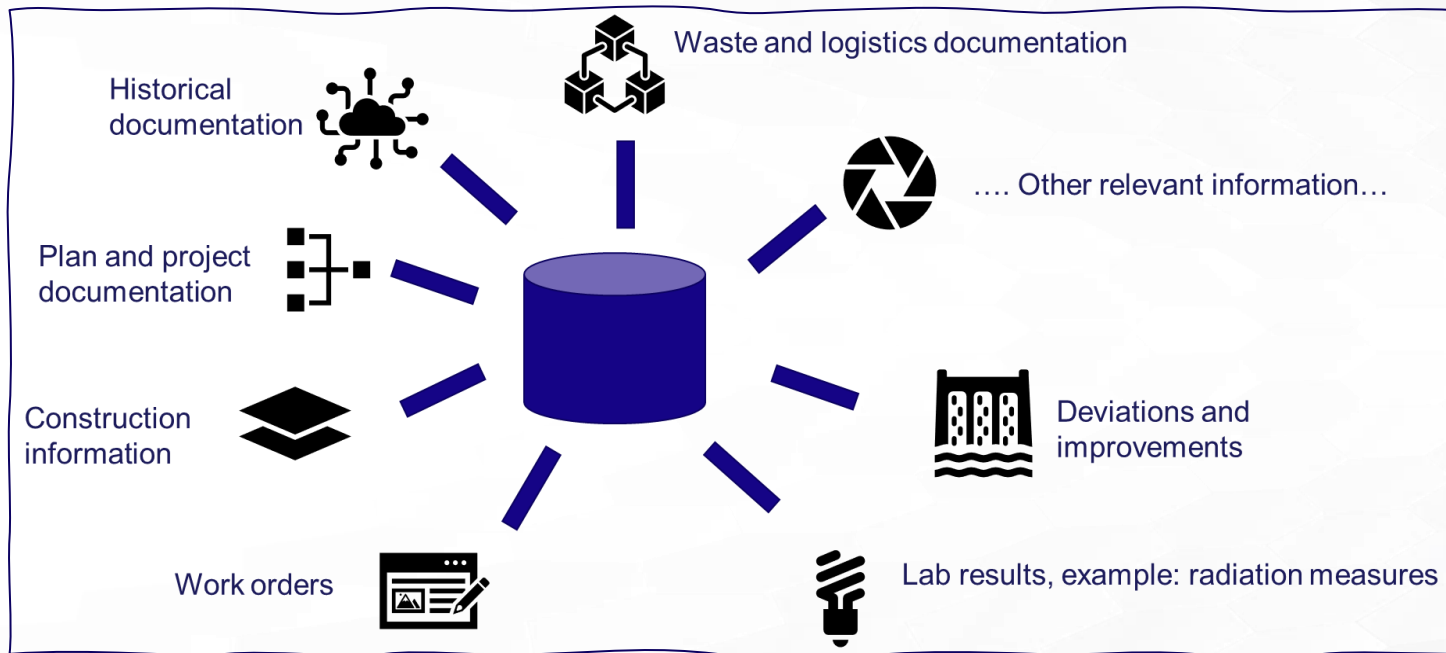

## Goals:

- Efficient processes, automate, connect
- Reuse solutions and data where possible
- «One stop» data gathering
- Data as basis for decisions
- Enhance and augment data between subject matters
- Increase safety and security

# It's all about logistics and control

# NND common information model

- Needed for digitalisation
- Combine existing and new data
- Common key(s) paramount
- Support logistics tracking across processes

# Approach

- Market dialogue to establish current best practice
- Learn from ongoing research, e.g. at IFE
- Procure IT solutions from the market to support our main processes<sup>1</sup>
- Use own employees for all data gathering
- Push the market with select subprocesses/solutions – e.g robotics for scanning, connect risk to BIM models etc.

<sup>1</sup> procurement to be announced by April 1<sup>st</sup>

# Expectations

- Existing solutions seem to cover the basics for
  - Decommissioning support
  - Waste management support
- Considerations must be taken on balance cost/reward on remodel of facilities
- Still work to do in the market on
  - realizing the full potential of all data sources
  - standardize keys, formats etc to avoid vendor lock-in
- Connecting all the dots – costing, planning, logistics, characterization, labs .... will mature over time

# Short term – Piloting !

While waiting for the main solution, NND will run selected pilots

- To verify the concepts (scanning, «BIM»ifying, connecting to existing data, connect to characterization data)
- Train and adapt procedures for data gathering (scanning, characterization)
- To test new concepts, eg connecting risks to BIM model – connected to security studies

=> Prepare workforce and procedures

# Thank you
